

Project code: 2022-1-IT02-KA171-HED-000073309

Home Institution: UNITIR - Univesiteti i Tiranes
Host Institution: UNICAM - Università di Camerino
Type of mobility: Student incoming mobility/Double Degree
Duration: 05/03/2024 – 04/08/2024

Description of the activities:

I had an amazing experience during my time at University of Camerino (UNICAM) in Italy. I enrolled for a double Master's degree program in Information Systems Engineering that offered quality education as well as enveloping me into rich Italian culture. The academic program was challenging yet rewarding at UNICAM. All classes were taught in English, which really helped. Subjects were well-organized and addressed different aspects of Computer Science field. It was excellent how the school supported us along with adequate resources to help us get through our studies hassle-free.

Living in Italy was a fantastic cultural experience. Camerino is a small town full of history and beauty around it. Often, local festivals and events took place in this village hence providing a platform through which one can encounter genuine Italian customs and meet more individuals. In Camerino, people are very friendly and kind-hearted. This made me many friends who belonged both to the university community as well as the locals themselves. One of the perks of living in Italy was the ease of travel. During my stay, I had the chance to visit several other Italian cities. Each city had its own unique charm and history. Traveling around Italy was not only fun but also educational, as I learned a lot about the country's rich cultural heritage.

I am grateful for this opportunity and would highly recommend it to other students. The knowledge, skills, and memories I gained here will always be a cherished part of my academic and personal journey. This experience has not only prepared me for my future career but also enriched my life in many ways.
