Name and Surname: Carlos Ignacio Matorras Vasvari
Home Institution: universidad nacional de Salta(UNSA)
Host Institution: Università degli studio de Camerino (UNICAM)
Type of mobility: Erasmus+
Duration: from 21/9/24 to 10/3/25

Description of the activities: during the mobility I attended classes of the “laurea magistrale” of geology taking courses of both first and second year .

The classes I picked were mainly the ones that offer contents not available in my home country including volcanic risk, ground water resources an hydro geological hazard, seismic risk, environmental chemistry, geo fluid reservoir and also I take the online courses of waste management and environmental sustainability

This lesson were aimed to the prevention and remediation of environmental issues

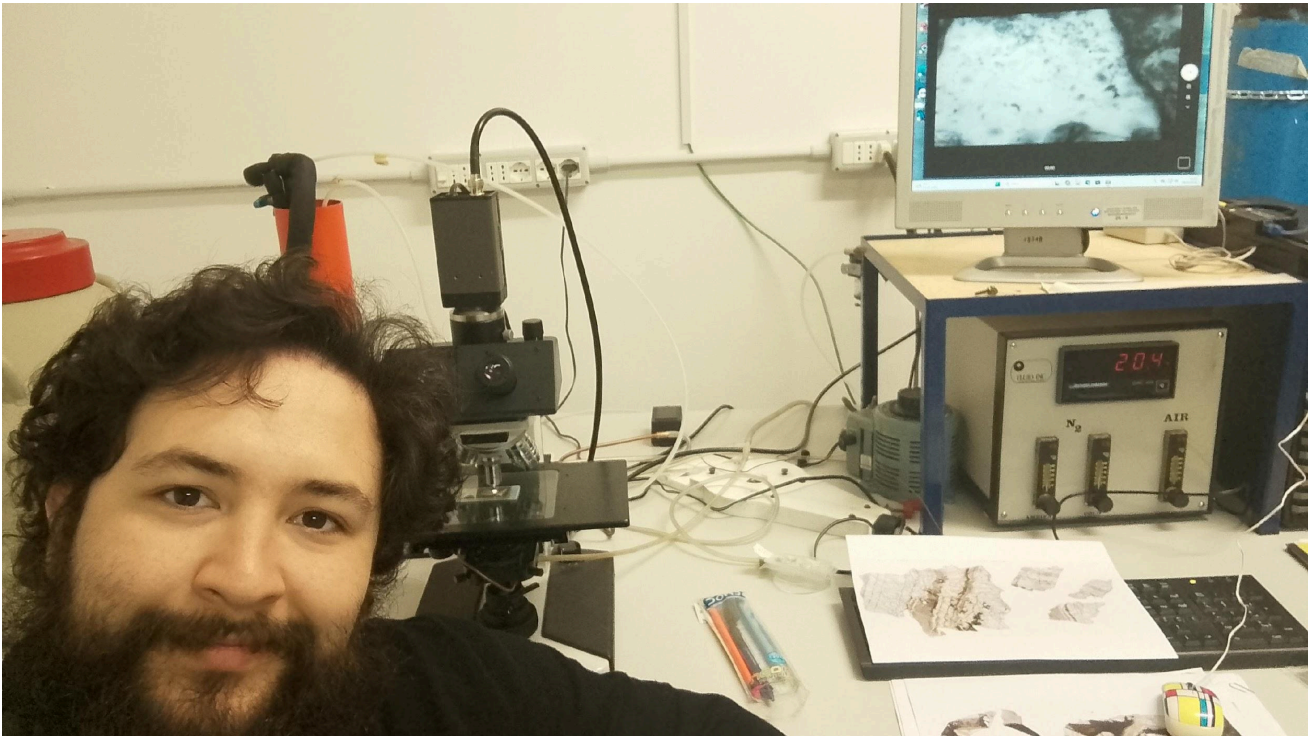

I also learned how to use s lot of new tools like software used for hydro geological control and the interpretation of seismic activity complete with a 3D rendering of a seismic cube

Besides the classes that were all in English I also take the opportunity to learn Italian as a third language , unfortunately there were no formal classes of Italian in presence so it was self-taught. This was almost mandatory since the majority of people in Camerino didn't speak English so my recommendation to future student is to learn at least the basics of the language of the place were they will travel to

After attending the classes there was still time to go exploring the region so I usually walk around the Camerino valley and the old town , thanks to the good transportation system it was also possible to travel around by train so I also visited the coast and some big cities like Florence, Venice and Genoa

The best part of the experience were all the people I met during my stay ,I made a great group of really nice friends and get the possibility of know other cultures and worldviews , this was the highlight of the experience in my opinion. It was an unique way of learning and sparks my interest in keep traveling around to see more of what the world has to offer
